The Smith Executive MBA program was an important journey in my life. I am glad that I made that decision which truly opened new doors for me. I had access to world-class professors, professional and dynamic classmates, and practical business knowledge which I applied to my everyday job. The journey was relatively short but the knowledge and the experience gained from this program have proved to be beneficial throughout my career.

Leadership Development LET SMITH POWER YOUR GROWTH

Even before you start class, you'll begin the executive assessment process, which identifies both your strengths and your areas for improvement. The data gathered in this process is then used to pair you with an executive coach, who works closely with you throughout the entire program. This leadership development process is among the most robust in the world, and truly sets the Smith School apart.

Curriculum

BECOME A COMPLETE LEADER

Rigor and balance are the main drivers of the Executive MBA curriculum. Rigor stems from traditionally demanding core courses – taught from an executive perspective – that make up the foundation of business practice. Balance is achieved through carefully selected mastery sessions, which are supplemental seminars that provide cross-functional perspectives drawn from organizational and social theories.

Taught by experts in their respective fields, mastery sessions include such topics as developing high-performance teams, managing conflict and creative problem-solving. This approach results in not only a balanced perspective, but a balanced workload.
